1. Experimenting with Silon :

There is a large textile factory at LETOVICE near BRNO (P50/N34) the name of which is TEXTILNI TVORBA, National Corporation. This factory produces technical fabrics such as sieves, filters, etc. The mentioned factory includes a special section that is strictly off limits for all employees. The head of this section is Ing. JERIE fnu, who is an employee of the Ministry of National Defence and whose superior is only the mentioned Ministry.

In this section Ing. JERIE puts silon to various tests. He is allotted only small quantities of silon for these tests.

It is rumoured among the employees that silon is going to be used for the production of parachutes.
